

ClickLearn Content SharePoint App Deployment Guide

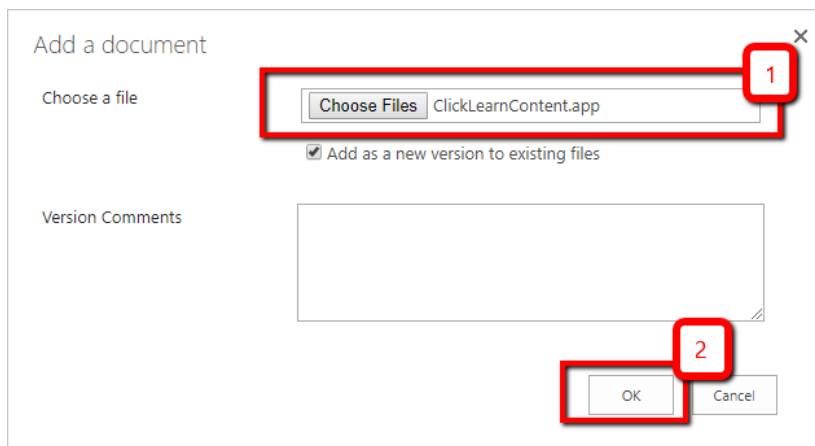

Step-1: Download & Unzip ClickLearnContent.zip to folder

Step-2: Go to SharePoint app catalogue Site Collection

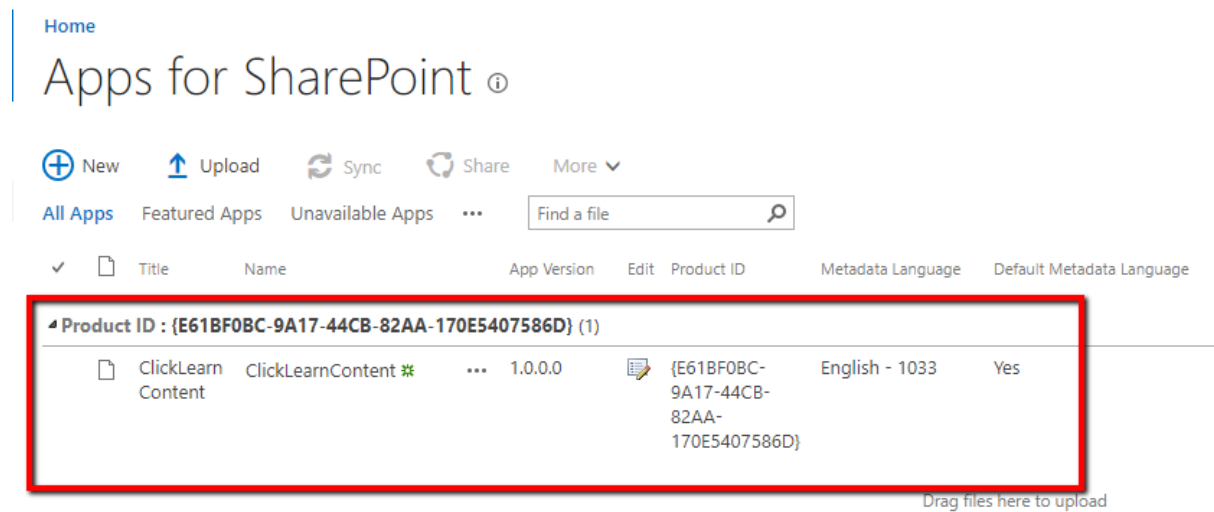

1. Click on “Apps for SharePoint” from left hand side navigation.
2. Click “Upload”

Step: 3: Choose “ClickLearnContent.app” file from folder which we Unzip in Step-1, and click OK

Step-4: Once you press ok you can see new record with name “ClickLearnContent.app”

Step-5: Click on edit property icon

Step-6: Fill out property values as per below screenshot and click SAVE button.

Image URL 1	<div>Type the Web address: (Click here to test)</div> <div><input type="text" value="https://portal.clicklearn.dk/images/cl-sharepoint-512x384-white.png"/></div> <div>Type the description:</div> <div><input type="text" value="https://portal.clicklearn.dk/images/cl-sharepoint-512x384-white.png"/></div> <div>An image or screenshot for this app. Images should have a width of 512 pixels and a height of 384 pixels.</div>

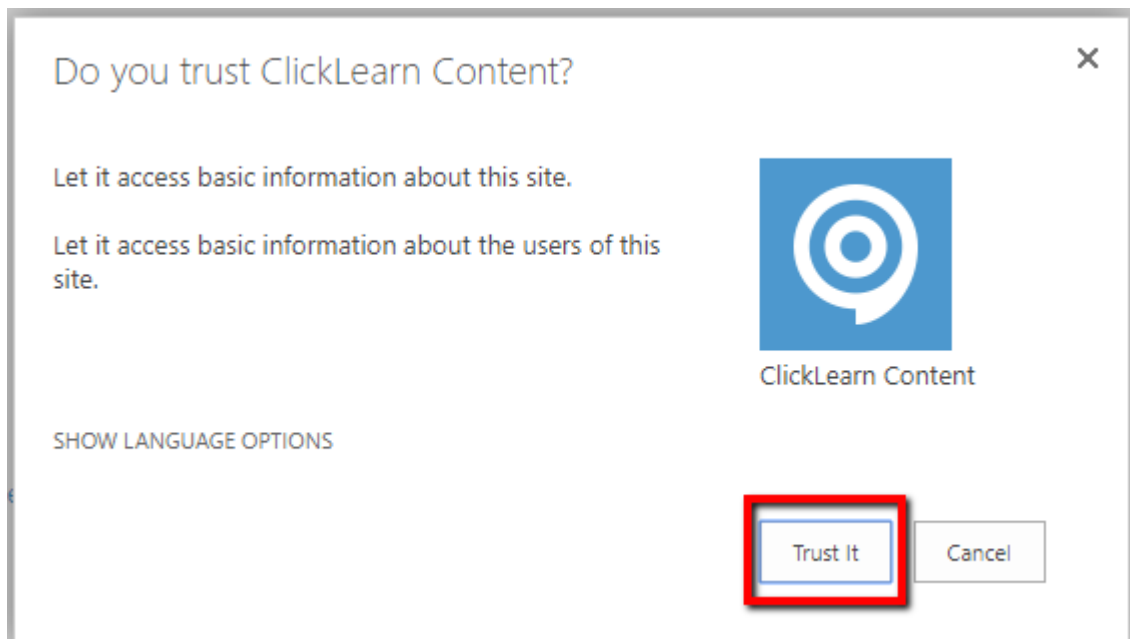

Step-7: Go to SharePoint site where you want to show content

NOTE: This feature is site level so adding App to top level site will not make visible in sub sites, we need to do following steps for each site where we wanted to use this app.

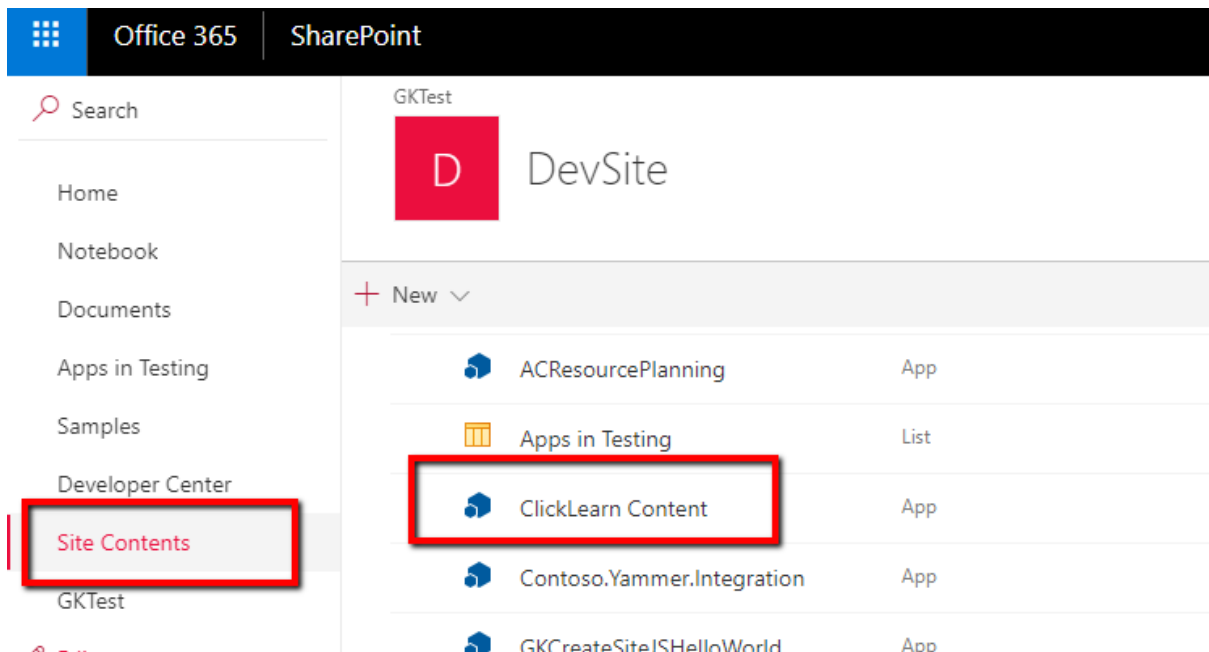

1. Click on settings Icon
2. Click "Add and app"
3. Click "Apps You Can Add"
4. Click "ClickLearn Content" App

Step-8: Click TRUST IT

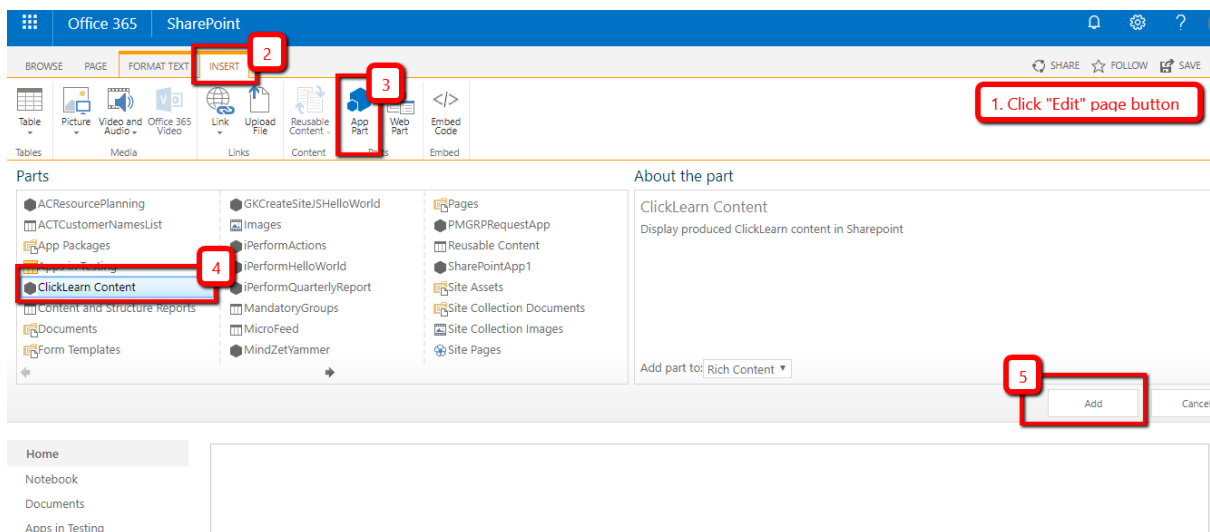

Step-9: Now page will redirect to “Site Content” where you can see “ClickLearn Content” app added.

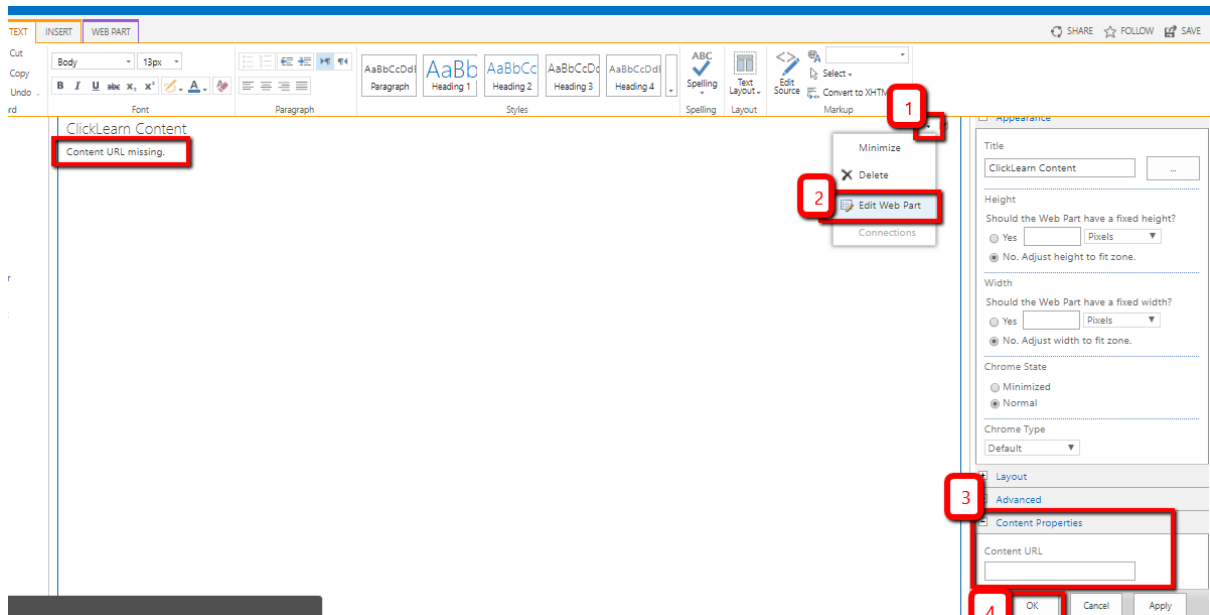

Step-10: Now create new page OR go to page where we want to show ClickLearn Content.

1. Click “Edit” button from right top corner to edit page
2. Select INSERT tab
3. Click “Add Part”
4. Select “ClickLearn Content” App
5. Click Add button

Step-11: Once you click add button “ClickLearn Content” App Part will be added to page (see below screenshot), but its showing message “Content URL missing” because we haven’t configured content URL yet, below step are to add new or change content URL.

1. Click on arrow
2. Click “Edit web part”
3. Expand Content Properties section and provide absolute URL of content in “Content URL” textbox
4. Press Ok button

Step-12: Now content will be loaded as you can see below, you can change content window size from same steps in Sptep-11. Finally press save button from Right top corner to save page changes.
